

Amino-D-Tox™

Amino Acids for Detoxification Support*

LIVER/DETOXIFICATION*

Amino-D-Tox™ is a synergistic formulation designed to support liver health and promote optimal detoxification.* In today's modern, industrialized world, the human body is exposed to hundreds of toxins through food, water, and air, such as pesticides, herbicides, chemical solvents, heavy metals, and other industrial chemicals. One of the primary roles of the liver is to help detoxify and eliminate toxins from the body. The liver also detoxifies medications and natural metabolic byproducts to promote overall health. A toxin must undergo phase I and phase II liver detoxification before it can be successfully eliminated from the body (through bowel movements or urine). Insufficient detoxification may occur due to genetics, environmental overload, or nutrient deficiencies.

Amino-D-Tox™ is formulated to gently help support phase II liver detox pathways.* Amino-D-Tox™ may be clinically beneficial to individuals with high chemical exposure,

certain genes, or suboptimal phase II detoxification function.* This product may promote healthy inflammatory responses and antioxidant status.* Sufficient phase II pathways support the body in properly detoxifying and eliminating compounds from phase I. Amino-D-Tox™ includes targeted amounts of amino acids, sulfur-containing compounds, and supportive nutrients to promote optimal phase II detox pathways and the excretion of toxins.* Amino D-Tox™ delivers glutathione and its precursors (N-acetyl-L-cysteine, glutamine, and glycine) to support antioxidant status and liver detox.* Calcium-D-glucarate is featured to support the body's defense against the effects of toxins and hormonal imbalances.* Alpha-ketoglutarate promotes the protein status needed for optimal phase II liver detox pathways.*

Benefits*

- Supports liver health and function
- Promotes phase II detoxification
- Supports antioxidant status
- Promotes healthy inflammatory responses
- Supports protein status

Recommended Use

Take 6 capsules per day between meals or as directed by your health-care practitioner.

Highlights

- Delivers a synergistic blend of amino acids, sulfur-containing compounds, and supportive nutrients to help gently support phase II liver detox pathways*
- Features glutathione and its precursors to support antioxidant status and liver detox*
- Includes calcium D-glucarate to support the body's defense against the effect of toxins and hormone accumulation*
- Features alpha-ketoglutarate to support protein status and phase II liver detox pathways*
- Gluten-free, dairy-free, and soy-free
- Non-GMO
