

Annatto-GG™ 300

300 mg Geranylgeraniol

HEALTHY AGING*

Annatto-GG™ 300 is a unique formula that delivers an impressive 300 mg of trans-geranylgeraniol (GG) per serving. Geranylgeraniol is an important compound that plays critical roles in the human body. GG is involved in the production of coenzyme Q10 (CoQ10) in the body, healthy muscle and bone function, hormone regulation, and energy production. GG is also needed for proper cell growth and healthy skin. This product features GG-Gold®, a patented form of GG extracted from the seeds of the annatto (*Bixa orellana*) plant.

Geranylgeraniol is found naturally in annatto, flaxseed, sunflower and olive oils, tomatoes, and select medicinal herbs. In healthy biology, GG is naturally produced in the

body; however, due to a variety of other factors, there may not be enough GG produced to support the body's needs. By introducing an outside source of GG, Annatto-GG™ 300 may help compensate for the natural decline in GG synthesis during the aging process, in addition to the decreased production of GG associated with certain commonly used medications.*

While there are numerous applications for Annatto-GG™ 300, the primary area of focus is supporting healthy aging—specifically, muscle protein synthesis, bone health, and cellular energy production.*

Benefits*

- Helps maintain muscle and bone health during aging
- Supports healthy aging and cellular energy production
- Helps promote CoQ10 production during age-related decline
- Supports hormone production, particularly testosterone
- May help replenish certain nutrients depleted by medications

Highlights

- 300 mg of GG per softgel to support healthy aging*
- Gluten-free, dairy-free, soy-free
- Non-GMO

Recommended Use

Take 1 softgel per day with a meal or as directed by your health-care practitioner.
