

Hepatatone Plus™

Herbs, Mushroom Extracts, and NAC

LIVER/DETOXIFICATION*

Hepatatone Plus™ is formulated to help support healthy liver function.* This synergistic blend of liver supportive nutrients includes the fungus *Cordyceps sinensis* and reishi mushroom, both of which have immune supportive properties, and help to support a balanced inflammatory response.* It also contains N-acetyl-L-cysteine (NAC), which helps support the body's response to oxidative stress and promotes production of glutathione, the body's master antioxidant and predominant antioxidant found in the liver.*

Cordyceps is a fungus that supports healthy liver function by promoting healthy lipid metabolism in the liver.* It also promotes a healthy inflammatory response.*

The bioactive compounds found in reishi mushrooms help support antioxidant status in the body and normal cholesterol metabolism.* Milk thistle seed contains the bioactive compound silymarin, which supports normal detoxification and liver health.* NAC supports the body's antioxidant pathways, including glutathione synthesis.* Glutathione also plays an important role in the body's detoxification processes, so NAC may help support normal detoxification.* The additional botanical compounds in Hepatatone Plus™ also support liver function by supporting antioxidant status and by promoting healthy lipid metabolism and a healthy inflammatory response.*

Benefits*

- Supports liver health
- Promotes normal detoxification

Recommended Use

Take 4 capsules per day or as directed by your health-care practitioner.

CordycepsPrime™ is a trademark of NuLiv USA, Inc.

Highlights

- *Cordyceps sinensis* as CordycepsPrime™ (standardized to contain 8% cordycepic acid and 0.28% adenosine) to support healthy lipid metabolism in the liver*
- Reishi full-spectrum blend to support antioxidant status and liver function*
- Milk thistle (standardized to contain 80% silymarin) and NAC to support normal detoxification*
