

# Homocysteine Supreme™

Homocysteine Metabolism Support\*

CARDIOVASCULAR HEALTH\*

Homocysteine Supreme™ contains synergistic nutrients that facilitate the efficient metabolism of homocysteine, including B vitamins in their bioidentical and bioactive forms.\* This formula may help promote healthy homocysteine metabolism.\* An optimally functioning homocysteine pathway provides methyl and sulfur groups that are required for proper biochemical reactions to occur that support healthy detoxification, immune function, cognitive function, and cardiovascular health.\* The pathways for healthy homocysteine metabolism require the B vitamins of B2, B6, folate, and B12.

Increased homocysteine levels may contribute to inflammation and excess oxidative stress. High homocysteine levels may occur due to a variety of factors that impair these pathways such as a poor diet, a high-protein diet, vitamin B deficiencies, smoking, and physical inactivity. Supporting the methylation pathways with nutrients, such as the ones contained in Homocysteine Supreme™, may promote healthy homocysteine levels.\*

## Benefits\*

- Supports normal methylation
- Supports cardiovascular health
- Supports normal cognitive function

## Recommended Use

Take 2 capsules per day with meals or as directed by your health-care practitioner.

Quatrefolic® is covered by U.S. Patent No. 7,947,662 and is a registered trademark of Gnosis S.p.A.

MecobalActive® is a registered trademark of HEALTHTECH BIO ACTIVES, S.L.U.

## Highlights

- Bioactive forms of vitamin B2, vitamin B6, folate, and vitamin B12 to support proper homocysteine metabolism\*
- Inclusion of Trimethylglycine to support normal methylation\*
- 5-methyltetrahydrofolate (as Quatrefolic®) and methylcobalamin (as MecobalActive®) for enhanced bioavailability
