

IgGI Shield™

Supports Healthy Intestinal Barrier Function*

IGGSHL | 3.7 oz (105 g) / IGGCAP | 120 capsules

IgGI Shield™ is a unique dairy-free 2-in-1 supplement designed to support gut health by helping to bind and remove certain toxins and microbes from the gastrointestinal (GI) tract while repairing and maintaining a healthy gut lining.* This dual-action approach of removing and repairing helps restore and maintain overall gut balance.* IgGI Shield™ is the only product on the market that combines two powerful ingredients — serum-bovine immunoglobulin (SBI) concentrate and N-acetyl-D-glucosamine (NAG) — to support gut and immune health.* This product may support individuals seeking GI comfort due to dietary changes, food sensitivities, stress, or common GI complaints, such as occasional diarrhea.* Available in both powder and capsule forms, it's easy to take with or without food as part of your daily routine.

GASTROINTESTINAL HEALTH*

Promotes gastrointestinal health*

Helps maintain a healthy gut lining*

Supports healthy immune responses in the gut*

Promotes a balanced gut microbial environment*

Supports the body's normal clearance of certain toxins and microbes*

Helps maintain a healthy inflammatory response*

N-Acetyl-D-Glucosamine	1 g	*
*Daily Value not established.		

Recommended Use for IgGI Shield™ Capsules: Take 4 capsules per day, or as directed by your health-care practitioner.

JUST THE FACTS:

Compare supplement facts to the leading brands

Serum-bovine immunoglobulin concentrate (ImmunoLin®)

- SBI provides immunoglobulins, which are proteins naturally produced by the immune system to fight off harmful invaders. For one such invader, ImmunoLin® has demonstrated the potential to bind lipopolysaccharides (or LPS), which can be produced by certain bacteria and can be associated with heightened inflammatory responses.*
- Unlike colostrum (a milk-based source of immunoglobulins), SBI is non-dairy, making it suitable for individuals with dairy sensitivities.*
- SBI helps bind and remove toxins and microbes from the gut, strengthens the gut barrier, and supports a healthy balance of gut bacteria.*
- It also helps maintain balanced immune responses and may support nutrient absorption.*

N-acetyl-D-glucosamine

- NAG works alongside SBI to help strengthen the gut lining while supporting the health of the protective mucosal layer in the GI tract.* This layer acts as the body's first line of defense against harmful substances and supports proper nutrient absorption.*
- NAG also promotes balanced immune and inflammatory responses, further supporting overall gut health.*
