

LibidoStim-F™

Supports Female Sexual Health*

WOMEN'S HEALTH*

Female sexual health is dependent on many factors including optimal hormone balance and adrenal function. The adrenal glands are small glands that sit on top of the kidneys and help support a healthy stress response and hormone conversion, which are critical for healthy sexual function. LibidoStim-F™ is a comprehensive formula that features several botanicals to help support optimal hormone balance, adrenal health, and healthy sexual function and satisfaction for women.*

This targeted formula features Tribulus, a botanical that has been shown in research to support sexual function and sexual experience in females.* Chrysin is also included to promote sex hormone conversion and balanced estrogen and testosterone.*

LibidoStim-F™ also contains dehydroepiandrosterone (DHEA), a hormone secreted by the adrenal glands and the precursor to androgens and estrogens. Damiana contains over 30 bioactive health-promoting compounds that may help promote vaginal health, sexual satisfaction, and hormone balance.* Tongkat ali may help support sexual function and testosterone balance in females.* *Ginkgo biloba*, Horny Goat Weed, and Chinese ginseng may help promote urinary tract health, a normal response to inflammation, physical performance, and normal sexual function.*

Benefits*

- Promotes healthy sexual function, desire, and satisfaction
- Supports female hormonal balance
- Helps support adrenal function
- Helps support urinary health and vaginal integrity

Recommended Use

Take 2 capsules per day, or as recommended by your health-care practitioner.
