

Finally, a **daily supplement** that raises the bar with top-quality functional ingredients to support your best health.

Peanut Butter Joint Power

Whey protein with glucosamine and chondroitin for joint and cartilage support*

Peanut Butter Joint Power™ is a delicious and nutritious functional supplement bar designed to support optimal joint and cartilage mobility, comfort, and flexibility.* This great-tasting bar is formulated with a chocolatey oat milk coating and a creamy peanut butter protein filling. It features an impressive 12 grams of protein from whey protein isolate, whey crisps, and peanut butter.

Glucosamine (“GLOO-koh-suh-meem”) and chondroitin (“kon-DROY-tin”) are building blocks that help take care of our joints. They can be found naturally in our bodies and in some

foods or supplements that can help keep joints comfortable and flexible.* Joints are like hinges that help our bones move smoothly, like when we bend our knees or wiggle our fingers. Cartilage is similar to a cushion that covers the ends of bones in these joints, helping them stay strong and comfortable when moving around. Keeping joints lubricated, mobile, and working optimally allows for regular physical activity as we age which is a key indicator of healthy aging.*

Unleash the Power of Motion

Unlike other mainstream bars, Fx Bars never use hydrogenated oils or trans fats, simple sugars (e.g., sucrose, high-fructose corn syrup), artificial sweeteners, synthetic colors, or additives. Allulose is the primary sweetener in Peanut Butter Joint Power™, which is found in many sweet-tasting foods like figs, maple syrup, and raisins. It has only one-tenth the calories of sucrose (table sugar) and is ideal for anyone looking to minimize sugar intake. **Finally, a convenient and nutritious supplement bar that empowers joints and embraces mobility.***

Recommended Use

1 bar per day

Consult with your health-care practitioner about your specific circumstances and any questions you may have regarding this product.

Benefits & Highlights

- Features targeted amounts of glucosamine and chondroitin to promote joint comfort and cartilage health*
- 12 g of protein per bar to support protein status*
- Only 4 g net carbs† and 1 g total sugar per bar; sweetened primarily with allulose for minimal impact on blood sugar†
- 4 g of fiber per bar
- U.S.A manufactured in Florida from U.S. and globally sourced premium ingredients

†The Net Carbs for one bar is 4 g and is calculated by subtracting the dietary fiber (4 g) and other low glycemic carbohydrates (15 g from allulose) from the total carbohydrates (23 g). Individuals who monitor their carbohydrate intake may deduct these low glycemic carbohydrates from the “Total Carb” count due to their minimal impact on blood sugar.
