

# Periommune™

Oral and Systemic Immune Support Probiotic\*

ORAL HEALTH\*

Periommune™ lozenges support oral and immune health in adult populations.\* This great-tasting and easily dissolvable formula features a heat-killed probiotic strain of *Lactobacillus plantarum* that has immune-supportive properties, known under the brand name, Immuno-LP20®.\* Periommune™ also features Wellmune®, a proprietary baker’s yeast beta-glucan from the organism *Saccharomyces cerevisiae*, to support the body’s immune response.\* These strains have been shown to be particularly beneficial for helping to support the nasopharynx (the upper part of the throat behind the nose), the mucous membrane in the mouth that serves as a protective barrier, and gum health.\*

Immuno-LP20® is derived from a strain of commensal bacteria found in fermented foods. Commensal bacteria are microbes that reside in and live in harmony with the body without harming human health. This strain of L-137 has been shown to support immune cell balance to help the body promote a healthy immune response.\* It may also support a healthy inflammatory response.\*

Periommune™ may also promote a healthy oral microbial environment that helps to support teeth and gum health.\* Certain types of unwanted bacteria in the mouth have been associated with irritation and other disturbances to gum health and structure.

Research has demonstrated that Immuno-LP20® may support a healthy immune response in the mouth.\*

Beta-glucans are polysaccharides (a type of complex carbohydrate) found in plant-based foods (e.g., mushrooms, yeast, and oats) that have been shown to support healthy metabolic function and immune health.\* Wellmune® is a beta-glucan that is derived from the cell wall of a highly purified, proprietary strain of the baker’s yeast, *S. cerevisiae*.\*

## Benefits\*

- Supports oral mucous membrane health
- Promotes gum and dental health
- Supports a healthy immune system
- Promotes nasopharynx health

## Recommended Use

Take 2 lozenges per day or as directed by your health-care practitioner. Allow lozenges to dissolve slowly and completely in mouth and swallow.

Immuno-LP20® is a registered trademark of House Foods Group, Inc.  
Wellmune® is a registered trademark of Kerry Group.

## Highlights

- 50 mg of Immuno-LP20® *Lactobacillus plantarum* L-137 to help support immune cell balance and oral health\*
- 250 mg of Wellmune® baker’s yeast beta-glucan (a proprietary strain of *S. cerevisiae*) to help support healthy immune responses in the mouth and in the body\*
- Pleasant-tasting, orange flavor
- Convenient lozenge delivery
- Gluten-free, dairy-free, soy-free, and non-GMO
