

ProbioMed™ Infant

Infant Probiotics with Human Milk Oligosaccharides

Highlights

- Strain transparency — specific strain identification with disclosed CFUs
- Combines a total of 5 billion CFUs of seven diverse probiotic strains for infants
- Shelf-stable — significant overage of strains ensures long shelf life and ensures delivery of stated CFU count
- Contains human milk oligosaccharides (HMOs — vital immune support for infants*
- Combines probiotics with an infant enzyme blend for digestive support*
- Provides infant-specific nutritional requirements found in human breast milk
- Delivered as an unflavored, easy-to-mix powder
- Portable, travel-sized stick packets
- No artificial flavors, ingredients, or sweeteners
- Designed for children from birth to 3 years old
- Free from GMOs, gluten, and soy

Benefits*

- Supports digestive health in infants
- Promotes balanced gut microbiota composition
- Nurtures children's developing immune system
- Promotes bowel regularity

ProbioMed™ Infant is a synergistic combination of seven diverse, well-researched *Lactobacillus* and *Bifidobacterium probiotic* bacteria strains, HMOs, NutraFlora® prebiotic fiber, and a digestive enzyme blend modeled after human breast milk constituents. This custom probiotic blend supplies 5 billion CFUs of probiotic bacteria per serving, and the amount of each strain is clearly disclosed. The shelf-stable, unflavored powder stick packs include a significant overage of strains to ensure delivery of the stated CFU count.

ProbioMed™ Infant is ideal for formula-fed infants from birth to 3 years of age, to help promote gastrointestinal microbial diversity, support immune function and nurture digestive health*. The probiotic powder can easily mix into infant formula, or can be combined with water or juice for young children, who could benefit from additional probiotic support, or who were not breastfed as babies.

Benefits of ProbioMed™ Infant

- Features *Lactobacillus rhamnosus GG* — the most-studied probiotic bacteria strain for supporting digestive and immune health*
- Includes supplemental HMOs, which are prebiotics vital for infant immune health*
- Contains *Bifidobacterium infantis*, which can fully utilize HMOs as a primary fuel source to support gut health*
- Supplies enzymes in amounts that would naturally occur in breast milk to assist in the digestion of carbohydrates and proteins
- Includes NutraFlora®, a short-chain fructo-oligosaccharide and prebiotic fiber

Dosing Guidelines: Children from birth to 3 years of age, take 1 g per day with breast milk or formula, or as directed by your health-care practitioner.

Consult with your health-care practitioner about your specific circumstances and any questions.
