

# VegeCleanse Plus™

*Comprehensive support for healthy detoxification\**

VegeCleanse Plus™ is a functional food powder that contains a comprehensive combination of nutrients, antioxidants, herbs, fiber, and fruit and vegetable extracts to support healthy detoxification.\*

In the best of times, the body requires appropriate nutritional support for effective functioning of the liver's detoxification mechanisms. In the modern era of unavoidable environmental pollution, increased mental and physiological stress, and the degraded nutrient density of the food supply, even when following a nutritious, whole-foods diet, the body may require higher amounts of the particular amino acids, minerals, and other factors necessary for detoxification than we can typically get from food alone.

VegeCleanse Plus™ is designed to aid the body's defenses against xenobiotics, pollutants and other harmful substances, as well as against remnants of pharmaceutical drugs, excess steroid hormones, and the byproducts of normal, healthy metabolism. It is specifically formulated to support both phase I and phase II of detoxification in the liver. This is important because detoxification is a two-step process, and some of the products created during phase I may still be somewhat harmful to the body, even though this is a normal, natural process. These intermediate products need to be broken down further during phase II, so if these phases are out of sync, the phase I products may build up and overwhelm the body's capacity to take them through phase II. The ingredients in VegeCleanse Plus™ help to balance these two processes.

You may be accustomed to thinking about "light" or plant-based foods, such as fruits and vegetables, as being important for healthy detoxification. And while these are beneficial, detoxification also requires a generous supply of amino acids, which are the building blocks of protein, and thus are derived from protein. This product features pea protein, which is less allergenic and easier to digest than some other proteins, such as soy, whey or casein. VegeCleanse Plus™ also provides fiber and nutrients helpful for stimulating bile production. These aid in supporting intestinal and colonic function, which facilitates normal excretion, the final step in eliminating detoxified compounds from the body.

This product may be used to support detoxification or also as a meal supplement under the direction of a healthcare professional.

**Recommended Use:** Mix 38 grams (one scoop) in eight ounces of water per day, or as directed by your health-care practitioner.

## Highlights:

- Features 17 grams of certified organic, nonGMO, easy-to-digest pea protein per serving
- Has a delicious berry-vanilla flavor
- Does not contain dairy, gluten, and lactose; sweetened with the natural herb stevia

Consult with your healthcare practitioner about your specific circumstances and any questions you may have.
